

SECURE YOUR EMAIL

## Barracuda Spam Firewall—Outbound Mode

For enterprises and ISPs, the Barracuda Spam Firewall—*Outbound Mode* ensures all outbound email is safe and secure before delivery.

Enterprises today are vulnerable to a variety of risks each time email leaves the corporate network. These risks include virus proliferation, dissemination of information that violates corporate policies, and spam proliferation. The Barracuda Spam Firewall—*Outbound Mode* is a mail transfer agent (MTA) that uses sophisticated email filtering and policy management to protect organizations from such risks. It's a powerful solution suitable for the largest of businesses, yet has the ease of use and affordability that smaller businesses demand.

### Powerful, Enterprise-Class Solution

The Barracuda Spam Firewall—*Outbound Mode* is a powerful enterprise-class solution that provides outbound email protection in three key ways:

- > Stops virus proliferation
- > Enforces corporate policies
- > Prevents spamming

No organization, especially no ISP, wants to be the source of viruses or spam. It not only puts a tremendous strain on the company's network, but it's also damaging to the organization's reputation. The Barracuda Spam Firewall—*Outbound Mode* ensures that all email leaving the network is virus-free and legitimate. It prevents people from unintentionally or intentionally using the organization's network to send viruses or spam.

The Barracuda Spam Firewall—*Outbound Mode* also helps ensure that employees are in compliance with government regulations and corporate information policies. With laws that now govern how or when companies are able to disseminate sensitive information, it is critical for companies to monitor emails for regulatory compliance. But even absent such regulations, it makes good business sense to enforce corporate information policies and protect intellectual property from being inappropriately disseminated.

### Easy to Use

The Barracuda Spam Firewall—*Outbound Mode* is a plug and play appliance that is easy to install and use. It can replace any existing outbound mail relay and sits between your client machines and the Internet. It can also be used by remote workers as a reliable mail relay.

### Affordable

The Barracuda Spam Firewall—*Outbound Mode* is the most affordable solution for outbound email protection. With no per user license fees, the Barracuda Spam Firewall—*Outbound Mode* is affordable for businesses of all sizes—from small organizations to global ISPs and enterprises.

# TECHNICAL SPECIFICATIONS

## Key Features

### STOPS VIRUS PROLIFERATION

- Dual Layer Virus Blocking
- Decompression of Archives
- File Type Blocking
- Virus Outbreak Warnings

### ENFORCES CORPORATE POLICIES

- Footer Attachment (HTML/text)
- Keyword Blocking/Quarantine
- Regular Expression Blocking/Quarantine
- Attachment Blocking/Quarantine
- Outbound Quarantine

### PREVENTS SPAMMING

- Rate Controls
- Domain Restrictions
- IP Restrictions
- Authentication (SASL/TLS)
- Remote User Support

### ADMINISTRATION

- Email Quarantine and Blocking
- Reports, Graphs, and Statistics
- Multilingual User Interface
- Multiple Domain Support

## Connectors

- Serial Port (DB-9)
- VGA
- PS/2 Keyboard
- Ethernet (see chart below)

## Front Panel Indicators

- Activity Indicator
- Email Blocked Indicator
- Email Quarantined Indicator
- Email Received Indicator
- Power Indicator
- Power Button
- Reset Button

## System Administration

- Web-based Interface
- Statistical Reporting Tools
- User Account Administration

## Power Requirements

- AC Input Voltage 100-240 Volts
- Frequency 50/60 Hz

## Support Options

- STANDARD SUPPORT
- Complimentary Telephone Support

### ENERGIZE UPDATES SUBSCRIPTION

- Hourly update of virus definitions
- Hourly update of spam rules

### INSTANT REPLACEMENT SERVICE

- Replacement unit shipped next business day

Clustering provides for redundancy and greater capacity
