FEATURES, FUNCTIONALITY AND TALKSWITCH STYLE

Great performance, great features. The TS-400 business speakerphone features an adjustable backlit LCD display, a sleek design and versatile programmability. This phone has superior sound quality and a large display.

The TS-400 was designed for easy, error-free call handling. This mid-level business speakerphone provides over a dozen one-touch buttons to access call features and separate controls for headset operation.

Designed for TalkSwitch: Like all of our phones, the TS-400 is built for smooth integration with TalkSwitch systems.

Easy to Use:

- 12 one-touch feature keys
- Program name and number for memory
- Supports handsfree group and intercom paging*
- 2.5 mm headset jacks
- Built-in headset amplifier
- Dedicated headset button
- Voicemail waiting indicator with message count
- 99 name/number telephone directory
- 99 name/number caller ID log
- Speaker, headset and In Use indicators
- Ringer, speaker, headset, and handset volume adjustable
- Data port
- Redial up to 32 digits
- Maintains basic function and retains memory without power

TS-400

* These features are available only for TalkSwitch telephone systems. These advanced features offered with TalkSwitch telephones are supported for TalkSwitch software releases beginning with 3.21.120 (Sept. 21/05). For best results, use the most recent version of TalkSwitch software.

This product is Hearing Aid Compatible and Volume Control is in compliance with FCC Part 68 and the Hearing Aid Compatibility Act. Available in North America.

TalkSwitch® designs and develops award-winning phone systems for small, multi-location and franchise businesses. Since its establishment in 1990, TalkSwitch has dedicated itself to developing PBXs and IP PBXs that tens of thousands of small businesses across North America rely on. With a growing global network of resellers, distributors and partners, TalkSwitch phones and phone systems are changing the way small businesses communicate. © TalkSwitch 2006
